

HEALTH INSURANCE

The health insurance system in France includes basic health insurance (covered by social security) and optional supplementary health insurance (often referred to as "mutual insurance" provided by private organisations or by the Assurance maladie [health insurance office]).

CANCELLATION OF STUDENT MUTUAL INSURANCE - LMDE AND SMEREP

At the start of the 2019/2020 academic year, students do not need to perform any special procedures on registering because they keep the plan under which they are covered, most often that of their parents, whatever it may be (general, agricultural or other schemes).

However, they are independent and have their own social security number under their universal health insurance coverage (PUMA).

Students who were already covered by one of the student mutual insurance plans, either SMEREP or LMDE, at the start of the 2018/2019 school year, will continue to be covered by their mutual insurance plan until 31 August 2019. They will be automatically covered by the health insurance office of their place of residence on 1 September 2019.

If you have come to undertake or continue studies in France: register on the international student reception website, in order to benefit from healthcare coverage upon your arrival in France. Registration on the site (the site is in French/English/Spanish) is simple and free. Your healthcare coverage will be provided on the date of your final registration with a higher institution and according to your address.
